

CD87, Rowley-Bankin ltr 1/8/64

10/25/69

This file consists of five large bound volumes. When I examined it last week this letter and the attachment were loose in the front. I ordered them or the chance they might implement what Paul had been collecting on this subject.

Of those listed as classified in the letter, not one is in CD 87, nor is there a green sheet covering any.

I assume from this that of the listed reports, only those mentioned by Rowley in the letter are properly classified.

Inherent in all of this is the suggestion Rowley has sent only what he considers of "Paramount interest" to the Commission only. Others might have different judgement.

In short, this strongly suggests he didn't send everything to the Commission, hence the Commission's files cannot contain all.
